DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1 and 11 have been considered but are most in view of the new ground(s) of rejection.

Information Disclosure Statement

2. The information disclosure statement filed 12/13/2010 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. Although an English abstract or explanation of JP 63-166235 was not provided with the IDS, the Examiner has obtained an English translation of this document, which attached to this office action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-3, 5-7, 9, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent No. 63-166235 (Fujihara) in view of US Patent No. 3,279,468 (Le Vine).

Art Unit: 3731

Fujihara discloses a mask for securing to a person's face that includes a plurality of on-compressible, non-conductive passive pressure points (1) on the skin contacting surface of the mask. The mask includes two eye apertures (2) and regions for covering the wearer's nose and cheekbones. The plurality of pressure points (1) are located in clusters below and between the eye apertures (2). As shown in Figure 2, the pressure points have a rounded, skin contacting surface.

Regarding claims 1 and 5, Fujihara fails to configure the pressure points (1) to be selectively removable and attachable to the mask through plurality of open apertures located at known pressure points, but Fujihara does disclose another plurality of pressure points (5) (see Figure 3) that are selectively inserted into apertures (3). Le Vine discloses a therapeutic mask with pressure points (33) that are selectively removable and attachable to the mask through apertures (39) that are arranged in groups near known acupressure points. This arrangement provides a means for adjusting the position of the pressures points to accommodate variations in the faces of different wearers (column 9, lines 33-45). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Fujihara device so that all of the pressure points are selectively removable and attachable to the mask through groups of apertures, as taught by Le Vine, in order to provide an acupressure device that is capable of being adjusted to an individual's face.

Regarding claims 3 and 7, the term "moulded" is a product-by-process limitation that is not given full patentable weight. The process by which an article is made is not germane to the issue of patentability of the device itself.

Regarding claim 5, both Fujihara and LeVine disclose at least three different groups of apertures corresponding to three different pressure points. Regarding claim 11, these apertures groups are located between the eye apertures along the nose bridge and below each eye aperture.

Regarding claim 6, both Fujihara and LeVine disclose mounting portions extending from the rear of the pressure points.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
